

DEV PATEL

Machine Learning Intern | Software Engineering Intern | Arlington, TX | +1 (682) 246-3736
devjpatelpersonal@gmail.com | [LinkedIn](#) | [Website](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Software Engineering graduate student with hands-on experience in software development using Python, ASP.NET Core, Angular, and SQL. Skilled in building scalable full-stack and backend applications, developing REST APIs, and working with relational databases in Agile environments. In addition to strong development experience, currently expanding into Machine Learning and AI, with a focus on building intelligent applications using OpenAI APIs and Retrieval-Augmented Generation (RAG). Actively learning and applying concepts in data-driven systems and AI integration. Seeking a Software Engineering / Machine Learning Internship to leverage development experience while growing in AI and modern intelligent technologies.

TECHNICAL SKILLS

Programming Languages: C#, Python, TypeScript, JavaScript, SQL, PowerShell
Frameworks & Web Technologies: ASP.NET Core, Angular, RESTful APIs, Web APIs, HTML5, CSS3, JSON, RDLC Reports
Databases & Data Engineering: MySQL, SQL Server, LINQ, Stored Procedures, Query Optimization, Data Modeling
Artificial Intelligence & Data Science: Artificial Intelligence Concepts, Generative AI, Data Mining, Machine Learning Fundamentals, Computer Vision Basics(Motion Detection), Data Preprocessing, Feature Engineering, Model Evaluation
Software Engineering Practices: Object-Oriented Programming (OOP), MVC Design Pattern, API Design, Error Handling
Cloud, DevOps & Tooling: Azure DevOps, Git, CI/CD Pipelines, PowerShell Automation, Visual Studio, VS Code
Testing & Quality Assurance: Unit Testing, API Testing (Postman), Debugging, Code Reviews
Development Methodologies: Agile/Scrum, Requirement Analysis, Cross-functional Collaboration

PROFESSIONAL EXPERIENCE

Software Developer (.NET)

Dev Information Technology Pvt. Ltd., Jaipur, India | Jun 2024 – Jun 2025

- Designed, developed, and maintained enterprise-scale web applications using ASP.NET Core and Angular.
- Built and consumed RESTful APIs to support modular, scalable backend services.
- Optimized MySQL queries, stored procedures, and indexing, improving application performance and response times.
- Developed RDLC reports for operational insights and data-driven decision-making.
- Worked in an Agile/Scrum environment, participating in sprint planning, daily standups, and code reviews.
- Collaborated with frontend, QA, and product teams to deliver production-ready features.

Software Developer Intern

Dev Information Technology Pvt. Ltd., Jaipur, India | Jan 2024 – May 2024

- Assisted in backend business logic implementation and responsive UI development using .NET and Angular.
- Supported API development, debugging, and testing for existing enterprise modules.
- Contributed to database enhancements and feature releases under senior developer guidance.
- Gained exposure to real-world production systems, version control, and CI/CD workflows.

EDUCATION

Master of Science (M.S.) — Computer Science

University of Texas at Arlington (UTA) | Arlington, TX | 2025 – 2027 (Expected)

Relevant Coursework: Advanced Software Engineering, Data Structures & Algorithms, Artificial Intelligence, Computer Vision, Data Mining, Cloud Computing & Big Data (CCBD), Database Systems, Big Data Analytics

Bachelor of Technology (B.Tech) — Information Technology

Ganpat University | Gujarat, India | 2020 – 2024

Relevant Coursework: Object-Oriented Programming (OOP), Programming for Problem Solving (PPS), Cloud Computing, Artificial Intelligence, Database Management Systems, Web Technologies, Operating Systems, Computer Networks

PROJECTS

Kaushal Darpan – College Management System | Government of Rajasthan, India.

- Built a large-scale college management system using ASP.NET Core and Angular.
- Developed modules for student records, fee management, reporting, and departmental workflows.
- Built secure REST APIs and optimized SQL queries, improving data retrieval performance by ~30%.

NICSI Project – Government IT Services Platform | Government of India.

- Contributed to a government IT services platform under NICSI initiatives.
- Worked on backend development, REST APIs, and SQL-based data operations using ASP.NET Core.
- Supported reporting, validation, and secure application workflows aligned with public-sector standards.
